

## **BA-1800 Industrial Air Cleaner**

### **BA-1800C**

BELFAB BA-1800 industrial air cleaner is a multi-purpose unit for ambient air filtering. This filtering system can be used on a wide range of industrial shop applications involving releases of fine dust into the air.

The BA-1800 is powered by a dual inlet blower providing 1800 CFM. The blower is a direct-drive system, requiring low maintenance.

The modular feature of the BA-1800 allows different permutations of filters arrangement. With the possibility to add-on to the standard pre-filter and pleated filter, the BA-1800 can be configured for each specific application. Possible filters that can be added include carbon filter, bag filter and even HEPA filter for extreme filtration efficiency.

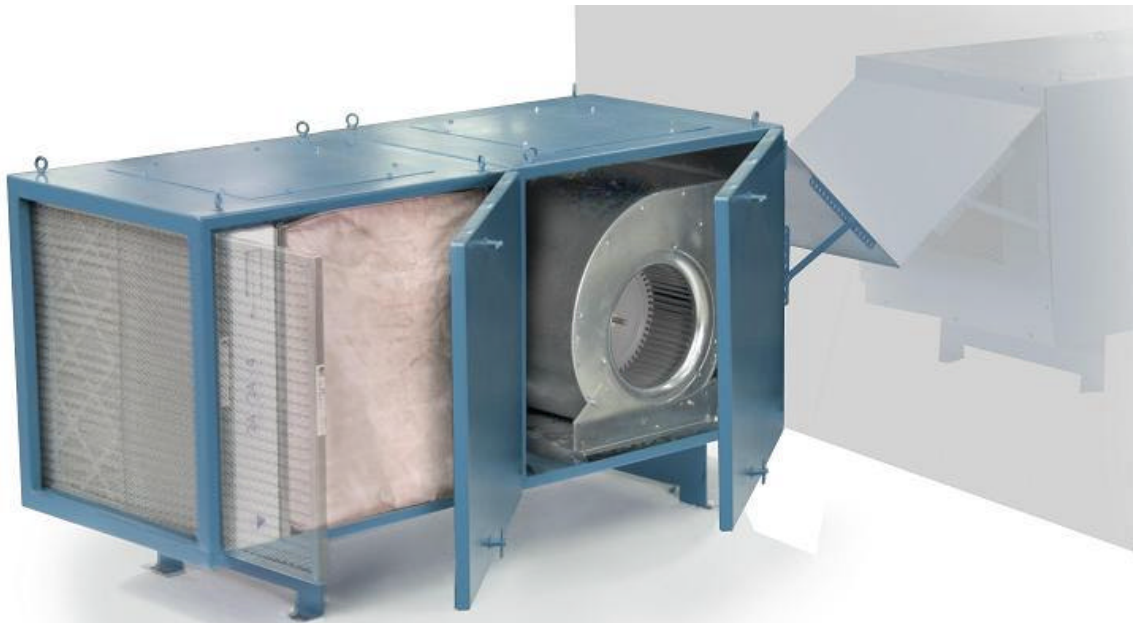

The BA-1800C is designed to be suspended from the ceiling, while the BA-1800G is to be installed on the ground with the discharge going towards the ceiling, to improve air circulation.

The BA-1800 cleans ambient air, improving the working environment in the shop.

### **BA-1800G**

## SPECIFICATIONS

Blower HP	¾ HP
Electrical Configuration	115V – 10 Amp Single phase
Capacity (CFM)	1800 CFM
Sound Level* (dB)	76 dB
Dimension (W x L x H) Standard Filter Module	26'' x 30'' x 26''
Dimension (W x L x H) Blower Module	26'' x 30'' x 26''
Dimension (W x L x H) HEPA Filter Module	26'' x 22'' x 26''
Module weight (lbs)	200 to 250 LBS

## FEATURES

(on High Efficiency configuration)

- Filter module:  
Pre-filter, pleated filter, bag filter
- Blower module
- Access doors
- Support legs
- Suspension hooks
- Louver (option)

## OPTIONS

- Low, medium or high efficiency
- Magnehelic gauge
- Fresh air inlet module
- Remote control
- Bag filter
- Carbon filter (odor filtering)
- HEPA filter (requires HEPA module, 26'' x 22'' x 26'')
- Cloth, spiral ducting for BA-1800G

## GUARANTY

All BELFAB manufactured equipment carry a one-year guaranty

\* BELFAB improves its products continuously and may change the specifications without notice.
